Introduction

About Document Management System

Document Management System (DMS) created by TheGoodGuys™ is designed to manage documents inside the company. DMS facilitates and expedites acceptance and rejection of documents and the collection of statistics. This program is user friendly, does not require a lot of system resources and is easily accessible via the Internet.

Installation guide

Prerequisites

You need to have installed all these programs to your Linux OS:

- Java 8+
- Node.js 8.10+
- Yarn 1.19.x
- Maven 3.6.x
- Tomcat 9.0.29
- H2 Database 1.4.200

Installing application

Create new folder and run following command:

```
git clone https://github.com/JustasMarkauskas/Document-Management-System.git
```

This will get a copy of the project installed locally. To install all of its dependencies and start each app, follow the instructions below. To run Spring Boot API, cd into the dms-app folder and run:

```
mvn clean install spring-boot:run -Dspring-boot.run.arguments=--server.port=8081
```

To run React UI, cd into the dms-ui folder and run:

```
1. yarn install
2. yarn start
```

Using application

- Browse to <http://localhost:3000/> to see REACT UI
- Browse to <http://localhost:8081/swagger-ui.html/> to use Swagger
- Browse to <http://localhost:8081/console/> to connect to database. In JDBC URL field enter db path: jdbc:h2:~/home/dmsDB1.db. Username: sa. Password: (do not write anything)

Administrator guide

Log in as administrator

If you want to log in as system administrator for the first time use username and password provided by system developers (TheGoodGuys). First page that you see will be users administration page. **After first log in it is strongly recommended to change your admin password to a new one, for security reasons.**

User administration page

Accessing Users administrating page

To access Users administrating page press “Users” button in navigation bar.

Creating new user

If you want to create user press “Add new user button”. You have to fill all input fields with user information except comment field that is optional. After filling all required info press “Submit” and new created user will be enrolled in to a data base.

Editing created user

You can edit created user information by clicking on user action  button in user administration page. In user information page you can edit existing user “First name”, “Last name” and “Comment” fields information, and change selected user password.

Assigning user to group

User can be assigned to a group by clicking user action button  and then pressing on “Assign” button in group field and then selecting wanted groups for user. **It is strongly recommended to assign user to a group in user information page.**

Document Types administration page

Accessing Document Types administrating page

To access Document Types administrating page press “Document types” button in navigation bar.

Creating new document type

To create new document type press “Add new document type”, fill all fields that are required and press “Submit” button.

Editing document types

To edit document type press action button  and edit comment field information.

Groups administration page

Accessing Document Types administrating page

To access Groups administrating page press “Groups” button in navigation bar.

Groups

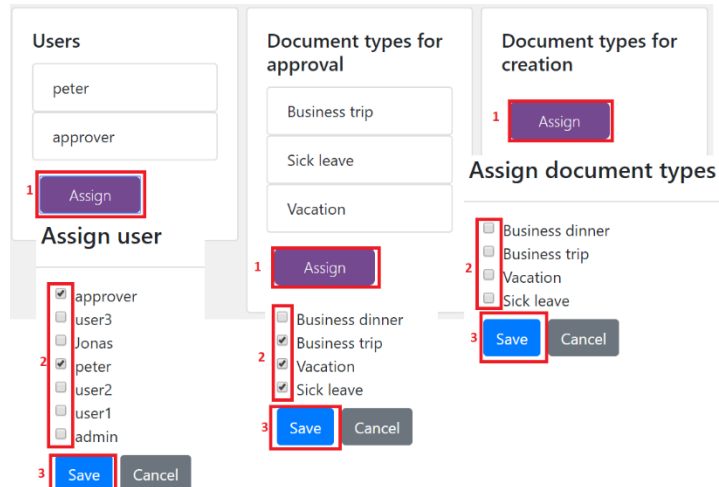

New group creation

To create new group press “Add new group” button, fill all fields that are required and press “Submit” button.

Managing existing group

To edit information about group, assign users or document types press action

button  in a new window you can edit “Comment” field information. In “User” field you can assign a user for a group by pressing “Assign” button, in “Document types for approval” field you can assign document types that your selected group can approve or reject by pressing “Assign” button and selecting wanted document types, and in “Document types for creation” field you can select document types that your group can create and submit.

The screenshot shows three panels in the Groups administration interface:

- Users:** Contains a list of users (peter, approver) and an "Assign" button (1). Below is an "Assign user" section with a list of users (approver, user3, Jonas, peter, user2, user1, admin) and a "Save" button (3).
